

# Enviro Camp 2017

## Session One

**June 5th - 9th**

*“Earth Day Every Day”*

This year’s Enviro Camp will kick off with a week dedicated to its namesake: the environment! During this eco-friendly week, campers will learn how to preserve our planet and save Mother Earth. Kids will pick up energy saving tips, turn trash into treasure, discover renewable energy, play games at the Recycling Carnival, and learn how to make every day Earth Day.

**June 12th - 16th**

*“Classic Camp Week”*

If your idea of summer camp includes tie dye shirts, team games on the lawn, and handmade art projects, then this week is meant for you! Kids will try out some tried-and-true, traditional camp activities. Make nature-inspired artwork, learn how to orienteer in Central Park, play minute-to-win-it challenges, and create cool crafts during “Classic Camp” week!

**June 19th - June 23rd**

*“Scales & Tales”*

Love all creatures big or small, furry or scaly, creepy or crawly? Get on the right track with Enviro Camp’s “Scales & Tales” Week! Uncover the animal kingdom’s amazing critters, scout out habitats, and witness Central Park’s wildlife firsthand!

**June 26th - June 30th**

*“Aquatic Adventures”*

Interested in “Aquatic Adventures?” Get your feet wet during this water-themed week and plunge into a wet and wild world! Kids will investigate ocean life, perform water tests, cast their lines into Central Park’s lake, and compete in water relay races.

## Session Two

**July 10th - 14th**

*“History’s Mysteries”*

Watch the Environmental Discovery Center transform into a time capsule during this history-themed week! Dig up some clues about “History’s Mysteries” with archeological digs, nature walks, crafts, and games. Be ready to learn about Native American culture, explore life as an early settler, and walk the plank with pirates!

**July 17th - 21st**

*“Investigation Stations”*

Put on your lab coats and goggles for Enviro Camp’s “Investigation Stations!” Whether you’re interested in astronomy, chemistry, physics, or biology, there will be plenty of scientific studies for everyone. With hands-on experiments, group STEM challenges, and microscope studies, young scientists will have a blast this week!

**July 24th - 28th**

*“Green Thumbs Up”*

Are you ready to have a “tree-mendous” time at Enviro Camp? With so many native plants surrounding the Environmental Discovery Center, kids will definitely sprout green thumbs this week! The young gardeners will study the environment up close, create nature crafts, take home their own plants, and contribute to the community garden in Central Park.

**July 31st - August 4th**

*“Camp Catch-All”*

Couldn't make it to the other weeks of camp? Or maybe you want to enjoy some super fun activities again? Enviro Camp’s final week will recap all the exciting activities from this summer! You’ll conduct science experiments, take a trip into the past, discover local plants and animals, celebrate Earth Day, and compete in water field day games!
