## **NOTICE TO PENINSULA EFFLUENT RECLAIMED WATER CUSTOMERS IN THE CITY OF ORMOND BEACH**

ORMOND BEACH – Due to the City's scheduled regulatory sampling event, planned for the week of July 24<sup>th</sup> to 28<sup>th</sup>, reclaimed water resource to the Peninsula may have a temporary interruption during this period. We anticipate minimum interruption, if any. Note, auxiliary groundwater sources may be utilized during this scheduled sampling event and shall remain in operation for the Western Ormond Beach areas of Hunter's Ridge and Breakaway Trails to promote appropriate irrigation and fire protection system supply needs in those areas. Wastewater treatment systems are at the present time properly performing and reclaimed water is currently being produced and placed into storage.

We appreciate peninsula area reuse customer consideration at this time and request that all customers use best conservation practices to promote replenishment of storage volumes to normal operating levels. We are hopeful any loss of irrigation service will be minimal and thank you in advance for your cooperation.
