

City of Ormond Beach General Employees Pension - International Equity ADR Portfolio

International equities continued their rally from the market bottom in March, posting their strongest two-quarter performance since 2009. However, it was not entirely an upward trajectory for the quarter, as markets lost ground in September. The September weakness was caused, in part, by a resurgence in COVID-19 cases in Europe (Chart 1) as investors fear that governments, particularly with the flu season approaching, could once again be forced to impose restrictions to stem the spread of the virus. On the other hand, vaccine news has been increasingly positive. Many vaccines are in late-stage trials, and potentially, one or more may be approved for at-risk populations in early 2021.

Given the closures related to COVID-19 across the globe, it is not a surprise that the global economy is expected to contract during 2020 at the fastest rate since World War II. Geographically, damage has been widespread with every major economy outside of China expected to shrink this year (Chart 2). Growth is expected to return in 2021, as pent-up demand along with unprecedented fiscal and monetary stimulus continue to boost economies. However, the stimulus has come at a cost, as government balance sheets that were stretched before the pandemic have had to take on massive amounts of additional debt to support unemployed

workers and prevent a wave of business closures. Monetary stimulus has been effective in combating the slowdown, but with interest rates already at or near zero, many investors view monetary stimulus as increasingly pushing on a string.

Global economic activity has seen a dramatic pickup since the shutdown induced slowdowns in the spring. The Manufacturing Purchasing Managers' Indices in the Eurozone, China and the United States have all seen a sharp, V-shaped recovery back to

expansory territory (Chart 3) with the September Eurozone reading at the highest level in over two years, while China was at a six-month high. Although the rebound in manufacturing has been strong, some industries, such as travel and leisure, physical retail and food services, remain well below pre-pandemic levels and are likely to continue to be a drag on employment and the overall strength of the economy until the COVID-19 threat has fully passed.

The rising tensions between China and much of the developed world, particularly the United States, has caused a decoupling of economies and

led companies to shift manufacturing away from China. While the shift was already occurring prior to COVID-19, the pandemic exposed many companies' overreliance upon China as a manufacturing base, causing this shift to accelerate. While this is negative for parts of China's economy, the nation has been slowly transforming its economy to become driven more by domestic demand than by a reliance on exports. Domestic demand in China is supported by the rapid rise in Chinese per capita income (Chart 4), which provides its citizens significantly more discretionary income to spend. The focus on domestic demand also allows China to be less dependent on the ebbs

and flows of other economies and less concerned about global perceptions of its government, which were tarnished in the spring with the passing of the widely condemned Hong Kong national security law.

The U.S. dollar was down 3.6% during the quarter, its largest quarterly drop in over three years. One factor in the recent weakness has been the sharp decrease in interest rates in the United States. The U.S. Federal Reserve lowered benchmark interest rates by 1.5% this year and guided that rates will remain near zero through 2023. A significant cause of the strength of the U.S. dollar since 2013 had been higher interest rates in the U.S. relative to other countries, which made the U.S. dollar more attractive. However, with the recent Federal Reserve moves, the interest rate differentials between the United States and other countries, such as Germany, have shrunk back to levels last seen in 2014, which immediately preceded the dollar's multi-year rally (Chart 5). This has caused a reversal for the U.S. dollar, which has fallen nearly 9% from the multi-year highs it reached in March when investors bid up the safe-haven currency. The last time the dollar experienced this large a drawdown was in 2017, coinciding with the last calendar year that international equities outpaced their U.S. counterparts.

Chart 3: Manufacturing Expanding Across the Globe

Data from 9/30/2019–9/30/2020
 (1) Manufacturing Purchasing Managers Index (PMI) is an indicator of economic health for manufacturing sectors. Levels above 50 are considered expansionary and levels below 50 are considered contractionary.

Services As % of GDP

The portfolio had positive absolute performance and outperformed the benchmark during the quarter. Information Technology and Consumer Discretionary were the top performing sectors in the portfolio, while the more defensive Utilities and Real Estate sectors were the weakest.

Taiwan Semiconductor Manufacturing was the top performing stock in the portfolio. The semiconductor foundry expects to see increased demand for its services, as Intel said it would look to outsource the manufacturing of some of its advanced chips. **Alibaba**, another strong performer within the portfolio, continues to be a beneficiary of China's e-commerce growth, which has accelerated due to the pandemic. **Dr. Reddy's Laboratories**, an Indian generic pharmaceutical manufacturer, saw shares rise after agreeing with Russia to cooperate on clinical trials and the distribution of the COVID-19 Sputnik V vaccine in India. The worst performing stock for the quarter was Chinese online discount retailer **Vipshop**. Investors of the Chi-

Chart 5: Falling Interest Rates in the United States Hurt U.S. Dollar

nese retailer worry that rising competition will lead to lower margins. Japanese pharmaceutical company **Chugai** performed poorly after reporting that its drug, Actemra, did not meet its primary endpoint for the treatment of COVID-19. **AerCap Holdings**, a global aircraft lessor, was hurt as prospects

for airline relief from the U.S. government look increasingly unlikely.

We were active in the portfolio during the quarter, increasing our weighting to Western Europe while decreasing our position in Asia/Pacific. We purchased **Neste**, the world's largest producer of

GEOGRAPHICAL EXPOSURE & PORTFOLIO CHANGES ⁽¹⁾ ⁽²⁾

⁽¹⁾Based on a representative account of the strategy discussed. Portfolio characteristics (e.g., sector weights, valuation, growth rate) are based on a representative account that we believe is illustrative of the strategy. Characteristics and/or holdings may not be the same for all accounts invested in the strategy due to factors such as pending trades or account restrictions. Additions/Deletions reflect security transactions completed by the date stated on this presentation, and the securities mentioned may not be held by all accounts invested in the strategy.

⁽²⁾Renaissance determines an issuer's country classification based on company filings and data provided by third-party sources such as Bloomberg or FactSet. Renaissance considers an issuer to be located in an emerging market country if the issuer is domiciled or incorporated in an emerging market country (as defined by the iShares MSCI Emerging Markets ETF) or exhibits risk characteristics (e.g., economic, geopolitical and regulatory risks) similar to emerging market countries.

⁽³⁾Weights as of the end of the presentation period. Cumulative total weighting may not add up to 100% due to rounding of percentages to the nearest decimal place.

⁽⁴⁾Any securities referenced should not be considered a recommendation to purchase or sell a particular security. These securities may represent a portion or all of the companies held in a representative account in this strategy as of the date stated and are intended for informational purposes only. Nonperformance-based criteria have been used to select the securities listed. The past performance of these securities is no guarantee of future results. The specific securities identified and described may not represent all of the securities purchased, sold or recommended for this strategy. The reader should not assume that investments in the securities identified or discussed were or will prove to be profitable. Portfolio holdings may not be current recommendations to buy or sell any security, and may no longer be held in the representative account. To request a complete list of portfolio holdings recommendations for the past year, the calculation methodology, or a list showing the contribution of every holding to the representative account's performance for the time period stated, please contact Renaissance at compliance@reninv.com.

Sources: Renaissance Research, FactSet

renewable diesel, as the company should benefit from increased environmental regulations around the world. We also purchased **Carrefour**, a European grocer, as the company's previous investments in online grocery sales should help amid a spike in COVID-19 cases in Europe. The new Prime Minister of Japan, Yoshihide Suga, has made it clear he believes mobile tariff rates should be significantly lower, leading us to sell our shares in **Nippon Telegraph & Telephone**. We also sold Singapore-based bank **United Overseas**, as lower interest rates will likely cause a prolonged period of low net interest margins.

With fears of rising COVID-19 cases, ongoing Brexit negotiations and a potentially contested U.S. presidential election, volatility is likely to continue in the final quarter of 2020. However, approval of a COVID-19 vaccine could quickly alter the investing landscape in favor of value stocks, which have been significant laggards over the past year. We believe that our portfolio continues to offer good long-term investment potential in the current environment.

⁽¹⁾ The Thomson Reuters ESG Combined score is the ESG Score discounted for significant ESG controversies impacting the company. The ESG Score is the overall company score based on the reported information in environmental, social, and corporate governance pillars. The ESG Controversies Score measures a company's exposure to environmental, social, and governance controversies and negative events reflected in global media.

⁽²⁾ The percentile rank of the company's ESG score in ascending order when compared to the iShares ACWI ex USA Index ETF, according to the company's GICS industry code classification.
