Subject: Noise Abatement - Aircraft using Ormond Beach Airport and not following the voluntary noise abatement path Sept. 2021

[External Email-Use Caution] - OB/IT Helpdesk

Here are my accumulations of September 2021 complaints of aircraft that are loud and not following the requested voluntary noise abatement path by the City of Ormond Beach. These are just the ones that I hear when I am home and do screenshots to determine the aircraft information. A lot of them are the same aircraft and flight schools over and over. If I cannot attend the next Ormond Beach Airport Advisory meeting I request this complaint information be added to the citizens comments section to be on the minutes.

In **September**, 2021:

About 44 aircraft between Sept. 6 and Sept. 20

About 60 aircraft between Sept. 21 and Sept. 30

In the past I sent emails to Steven Lichliter, Airport Manager, but the file size gets very large and changing it to a pdf file it sometimes gets formatted strange. I am now trying out putting the information on a web page I created and that will make it more accessible for people searching for the Ormond Beach Airport noise issue or for people I send the links to. I will be working on indexing the main page soon to show on search results.
